

Final Project – Poster Specification

Specifics:

1. Poster Session will be Tuesday, December 6 from 2-3pm in Chambers 115. You need everything setup (including your demo) by 1:45pm.
2. Poster should be:
 - a. 3 feet wide by 2 feet high
 - b. Created in PowerPoint:
 - i. Modify the page settings to a Custom 36"x24"
 - ii. You may receive a warning about printing – continue anyway
 - c. White background (no colored or photo backgrounds)
3. Audience is a general technical audience – do not assume they know the history or significance of your project.
4. Poster should include, at a minimum, the following information (organized how you wish):
 - a. Project Title, Team Members, Class
 - b. Problem Statement
 - c. Solution
 - d. Results and Verification
 - e. Future Work
5. If you would like me to print the poster for you (and for free), submit your PowerPoint and pdf in the Poster Assignment on Sakai by 9am on Monday December 5. Otherwise, print it yourself and submit a pdf on Sakai by 2pm on Tuesday December 6.

Grading:

- 60% will be based on the rubric and instructor evaluation
- 40% will be the average of non-team reviews of the poster (peer and other ECPE faculty)

Hints and Ideas:

- Poster should be a good balance of text and figures. People do not want to read paragraphs of text so use bulleted lists and short sentences where appropriate. Figures can convey far more than text so consider methods of displaying your ideas instead of stating them; ensure figures are relevant, well labeled, and clear.
- Ensure fonts are readable from at least 2-3 feet away (this includes legends, titles, and labels on figures as well).
- Posters should be pleasing to look at so ensure that fonts are used consistently, text and figures align properly, capitalization is consistent, and similar small details are consistent across the entire poster.
- See other resources on Sakai class site.
